PROFESSIONAL SUMMARY

Full-stack developer with experience building mobile and web applications using Flutter, Next.js, and NestJS. Contributed to the development of a betting platform and multiple real-world applications including e-commerce and real-time chat systems. Skilled in API integration, real-time systems, and scalable architecture, with a strong focus on performance and user experience.

CORE SKILLS

Frontend: Flutter, Next.js, React

Backend: NestJS, REST APIs, WebSockets

Mobile: Dart, Firebase

State Management: Provider, Riverpod, Bloc, GetX

Databases: Firebase, SQLite, Hive

Tools: Git, Postman, Figma

Architecture: Clean Architecture, MVC

Sed in consequat mi. Sed pulvinar lacinia felis eu finibus.

PROFESSIONAL EXPERIENCE

Full-Stack / Flutter Developer (Remote)

Kodex Africa — April 2024 - Present

Developed and maintained mobile applications using Flutter

Integrated APIs and Firebase services for authentication and real-time data

Built reusable components and improved application performance

Collaborated with teams to deliver responsive and user-friendly applications

KEY PROJECT EXPERIENCE

Betting Platform (Confidential Project)

Flutter, Next.js, NestJS, APIs

Contributed to the development of a betting application with real-time data updates

Implemented core features such as odds display, user interactions, and API

integration

Worked on frontend (Flutter) and backend communication (NestJS APIs)

Ensured smooth user experience with fast data rendering and updates

E-Commerce Application

Flutter, Firebase, Stripe API

Built a shopping app with product listing, cart, and payment integration

Integrated Stripe for secure checkout

Implemented authentication and user session handling

Real-Time Chat Application

Flutter, WebSockets

Developed a messaging system with real-time communication

Implemented WebSocket-based architecture for instant updates

Forex Chart Application

Flutter, APIs

Built a financial charting app with live data updates

Designed interactive chart UI similar to trading platforms

Hotel Finder App

Flutter, Google Maps API

Created a location-based app for discovering nearby hotels

Integrated maps and geolocation services

EDUCATION

Diploma in Mobile Application Development
Kodex Africa — 2024

ADDITIONAL INFORMATION

Experience working on real-world applications and production-like systems
Strong problem-solving and debugging skills
Fast learner adapting to new technologies (Next.js, NestJS)

Passion for building scalable and user-focused applications
